***Election/Restrictions***

Claim 1 is allowable. The restriction requirement between groups A and B, among groups C-E, and between groups F and G, as set forth in the Office action mailed on 12/14/05, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 6, 10, 11, and 34, belonging to groups B, D, E, and G, respectively, are no longer withdrawn from consideration because the claims requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Jenkins on 10/30/06.

The application has been amended as follows:

On line 1 of claim 10, "claim 8" was replaced with --claim 1--.

On line 1 of claim 11, "claim 8" was replaced with --claim 1--.

The changes were made to correct dependency upon a cancelled claim.

### ***Allowable Subject Matter***

Claims 1-19, 21, 22, 25, 26, and 29-45 are allowed. The allowability of these claims was addressed in the previous Office action with regard to claim 20, the allowable subject matter of which has been incorporated into claim 1, and is repeated below.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest a neural spike detection system, wherein the system comprises a multiplexer having an output and at least one input connected to the neural sensors for selecting a neural signal as a reference signal as the output, and a plurality of operational amplifiers having first and second inputs wherein the neural sensors are connected to the first inputs of the operational amplifiers and the second inputs are connected to the output of the multiplexer for providing a

difference signal between the neural signals of the neural sensors and the reference signal, in combination with all of the other limitations of the claims.
